

About Us

Ebenezer Healthcare Access is a 501 c3 non-profit organization serving clients in Ohio. We help immigrants to overcome language and cultural barriers in accessing healthcare services, by providing health education, medical scheduling, cultural competency training for healthcare professionals, scheduling medical transportation, medical interpretation and translation. Since the organization's existence in 2019, we have had many success stories impacting many lives for the good. We have many partners in refugee and immigrant communities ranging from different local health systems, local immigrants, churches and academic institutions.

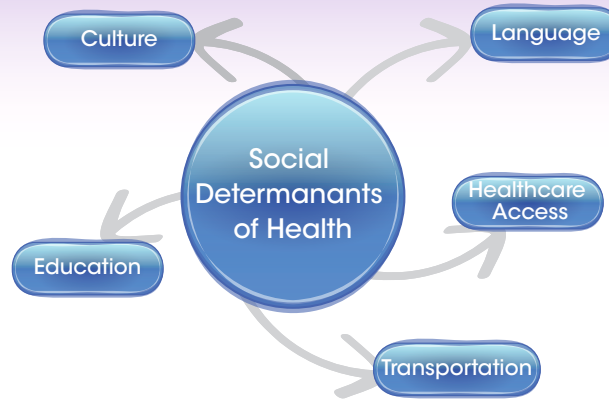

"I founded Ebenezer Healthcare Access to help those in need of support & assistance in navigating the healthcare system."

Jean de Dieu Mukunzi, MPH, PMP
Executive Director / Founder

Who Do We Serve?

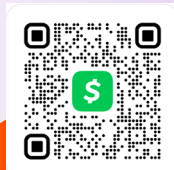

Our team serves immigrants and refugee populations struggling with language barriers to meet their health needs and community resources while navigating the US healthcare system. Our clients come from all over the world, and we provide translation and interpretation services in different languages such as Kinyarwanda, English, French, Russian, Ukrainian, Spanish, Arabic, Swahili, Kirundi, Lingala, Amharic and Tigrinya.

Our Impact

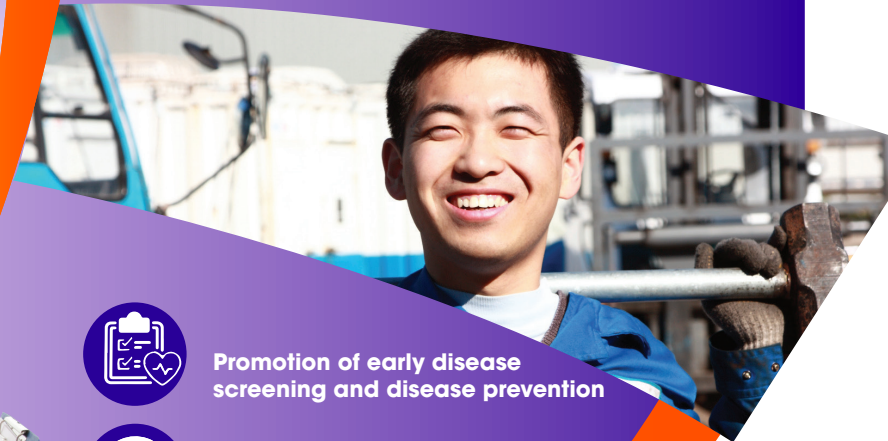

From the first year of the implementation of care coordination services in 2022, we have assisted many refugees, immigrants, and other underserved people from 24 countries of Europe, Africa, North America, and Latin America. We assisted the people to overcome their cultural barriers and address their social determinants of health and health disparities in the United States. This was delivered through many pathways which are care-delivery processes to connect clients to the local healthcare systems and community resources.
